Understanding your bill (Cont'd)

GRT & other tax surcharges: Taxes on Con Edison gross receipts from sales of utility services and other tax surcharges.

Meter Multiplier: If your meter multiplier is greater than one, your total usage will be the reading difference times the meter multiplier.

Monthly rate adjustment: Adjustment for miscellaneous costs and credits, and from October through May, for the effect of variation from normal weather.

New Read: Monthly meter readings are no longer used for billing purposes. Instead, we use the data provided by your smart meter(s), which improve accuracy by recording your energy use in 15-minute intervals. Your New Read is provided for illustrative purposes only.

Prior Read: Your prior meter reading was calculated when your last bill was issued.

Reading Difference: The reading difference is the result of subtracting your prior meter reading from your new meter reading. Please note: the New Read and Prior Read values shown on your bill have been rounded and/or truncated. Calculating the Read Diff yourself may result in a different value than the one shown here.

Reading Type: You will see the word "Estimated" here if your smart meter was unable to communicate your energy use during the billing period. Otherwise, your reading type will be "Actual".

Remaining: Charge for maintaining the system through which Con Edison delivers gas to you.

Sales tax: Tax collected on behalf of New York State and/or your locality.

System Benefits Charge: A charge that recovers costs associated with energy-efficiency and renewable-energy programs implemented by the Company and the New York State Energy Research and Development Authority (NYSERDA).

Temperature * Source: Central Park Weather station.

Total Usage (kWh): Your total usage is the sum of the 15-minute interval data recorded by your smart meter(s) during the billing period. This is used to calculate the energy-delivery and energy-supply charges on your bill.
